

Alumil

ANODIZING COLOR GUIDE

Alumil, being an anodized aluminum, is a material that can be anodized in various colors. The color of the anodized aluminum is determined by the thickness of the anodized layer and the type of dye used.

INOX

INOX is a type of stainless steel that is resistant to corrosion and is used in a wide range of applications. It is a material that is known for its durability and strength.

BRUSHED FINISHES

Brushed finishes are a type of surface treatment that gives a material a smooth, brushed appearance. They are used in a wide range of applications and are known for their durability and strength.

Alumil is a leading manufacturer of anodized aluminum products. Our products are known for their durability, strength, and resistance to corrosion. We offer a wide range of colors and finishes to meet your needs.

- High quality anodized aluminum products
- Wide range of colors and finishes
- Durable and resistant to corrosion
- Available in various sizes and shapes
- Fast and reliable service
- Competitive prices
- Customized solutions for your needs
- ISO 9001 certified
- 20 years of experience in the industry
- 100% customer satisfaction
- 24/7 customer support
